

ChronusQ::X2C::computeOneEX2C

```
graph LR; A[ChronusQ::X2C::computeOneEX2C] --> B[ChronusQ::ORTH]
```

A diagram showing a call to the function ChronusQ::X2C::computeOneEX2C. A blue arrow points from this call to a box labeled ChronusQ::ORTH, indicating that this function is responsible for computing the orthogonal matrix.

ChronusQ::ORTH
